

PUKEKOHE 3 HOUR

2015 Update 5 - Pukekohe 3 Hour

Pukekohe 3hour enduro

Friday hosted a full day of testing on the old Pukekohe Track. The team battled steering issues most of the day which was finally sorted.

Saturday started off with a 30 minute Qualifying session where we managed to Qualify 6th out of a strong 40 car field. I started the race and was off to a good start getting into an early rhythm. The team jumped at the chance to do a quick fuel stop, however as I was leaving the pit lane the marshals stopped the car from rejoining the track because there was fuel leaking from the car, 2 laps later I was allowed to rejoin. I then settled back into my rhythm before 1.15 hours

into the race we blew the rear axle off on a safety car restart causing me to be stranded on the back straight. With the damage too major to fix we had an early exit from the race. "It was disappointing to be stuck in the pits after getting a solid start". Thanks to Varney Motorsport for the opportunity to be part of their great team and BEL Group for supporting me this weekend. "The knowledge I have gained over the weekend will sure help with my career"

Thanks Sam Barry
